Spectrum Sheet Color Schedule!

May 18, 2017

We are sooooo close it hurts! As you can see the Spectrum equipment is nearly ready to go hot. We have been checking and double checking, tightening bolts and finalizing the last details of the build out. We've even gone so far as to roll a small test sheet! The stars are aligning and glass will be out soon!

GLASS SCHEDULE

Here is what you can expect:
1ST SET OF FURNACES (Summer & Fall 2017):

- Clear textures
- Clear Fusible
- Opals
- Ambers
- Yellow
- Orange
- Reds
- Champagne
- Bronze

2ND SET OF FURNACES (Fall & Winter 2017/2018):

- Clear textures
- Opal mixes
- Blues
- Purples
- Black
- Teal
- Steel
- Navy
- Seagreen
- Copper
- Deep Aqua

As you know the color palette is vast and we are anticipating 9-12 months before we have run through every single color that Spectrum initially had to offer. Not all products in each color base will be produced initially. Our focus will be on the most requested products and will move on to those left behind as we make our way through the second cycle on each furnace.

Keep it Glassy,

The Oceanside Glass & Tile Art Glass Team
